

Cement and Engineering News Volume 24

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 246 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 edition. Excerpt: . . . builders, and by sounding the high seas of modern concrete construction, of lighting, of heating, of ventilation, of sanitary appliances, of elevator equipment, and safety devices, we believe we have pronounced the last word in up-to-date factory buildings. The width of sixty feet, made up in three bays, with shadow on the work benches and machine tools. In addition, inserts built into the bottom of the concrete beams as shown on the photograph of the interior, afford a simple and effective support for shaft hangers, piping, and wiring. By means of an ingenious device, designed by the Deering Works, consisting of slotted steel supports spanning the space between the longitudinal inserts, any adjustment or arrangement of shafting or supports that may be desired can be quickly and easily obtained; as John G. Wood graphically expressed it, We can play checkers with the shafting on...

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

-- **Mr. Grant Stanton PhD**

A whole new eBook with an all new standpoint. It is actually rally fascinating throgh reading through time period. You wont truly feel monotony at anytime of your own time (that's what catalogues are for relating to when you request me).

-- **Claire Bartell**
