## Battleships: Issues Arising from the Explosion Aboard the U.S.S. Iowa: T-Nsiad-91-2

---

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.GAO discussed the explosion aboard the U. S. S. Iowa, focusing on: (1) an independent investigation of the Navys technical analysis of the explosion; (2) equipment serviceability and safety; (3) manning and training issues; and (4) the battleships employment plans and mission. GAO found that: (1) the Department of Energys Sandia National Laboratory concluded that there was a plausible alternative scenario to the Navys finding of an intentional act; (2) as a result of Sandias findings, the Navy halted all firings of the 16-inch guns and initiated further testing; (3) the Navy and Sandia believed that the ban could be lifted by using a different propellant configuration and taking different management actions; (4) Sandia could not confirm or deny the Navy conclusion that foreign material residue found in the gun was evidence of a chemically activated detonator device; (5) the Navys need to maintain two battleships was questionable; (6) there was no pattern of failures that indicated systematic problems with the guns and other turret equipment; (7) injury reports revealed no prior safety problems that could be related to the explosion;...

### Reviews

*This ebook is really gripping and fascinating. it had been writtern extremely perfectly and useful. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Leopold Hills**

*Totally among the finest publication I actually have at any time study. I am quite late in start reading this one, but better then never. I found out this publication from my dad and i suggested this pdf to discover.*
