

# Graphics Applied to Arithmetic, Mensuration and Statics

Filesize: 2.12 MB

## ***Reviews***

*It is really an remarkable book which i have ever go through. It can be writter in simple terms and not difficult to understand. I am just effortlessly can get a enjoyment of reading a composed pdf.  
(Dr. Lily Wunsch II)*

## GRAPHICS APPLIED TO ARITHMETIC, MENSURATION AND STATICS

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1908 Excerpt: . OF FORCES. 207 Theorem. Any set of coplanar forces is equivalent to a resultant force through some assigned point and a couple. By the previous theorem each force of the set may be replaced by an equal vectored force through O and a couple. The forces, being now concurrent, have in general a resultant found by the vector polygon. The momental areas of the couples may be added to the momental area of a resultant couple, i.e. the couples are equivalent to a resultant couple. Theorem. Any set of forces reduces to (i) a single resultant, or (ii) a couple, or (iii) is in equilibrium. Since a couple may have any position in its plane and may have its forces of any magnitude, provided the momental area is constant, we may replace the resultant couple of the last theorem by an equivalent couple having its forces o-(Fig. 194) and o-, where cr is the resultant of the concurrent forces at O. If the arm of the couple is p, and S is the magnitude cr, then  $S.p = M$ , M being the known momental area. If, now, the couple be supposed placed so that its force-r passes through O and is in a line with the resultant force cr there, then o-and-r cancel, and we have a single resultant cr at a distance p from O. Should the resultant of the concurrent forces at O be zero, the set of forces reduces to the couple of...
